

MD.SHAHZAD HUSSAIN RAYIED

SOFTWARE ENGINEER

I am a highly motivated student major in software engineering with a love for creating cutting-edge software solutions. I have developed a strong foundation in programming languages, software engineering principles throughout my academic career. Through an internship where I can actively contribute to the creation of cutting-edge software applications, I'm keen to put my knowledge to use and get real-world experience. I have strong communication and teamwork abilities, am a quick learner, and am adaptable to new technologies and frameworks. As a software engineer who wants to advance in the industry, I am thrilled about having a chance to help your company grow.

EDUCATION

BACHELOR OF SCIENCE (BSC) IN COMPUTER SCIENCE & ENGINEERING (CSE)

JAN 2020-PRESENT

AMERICAN INTERNATIONAL UNIVERSITY-BANGLADESH(AIUB)

Major in Software Engineering American International University-Bangladesh (AIUB)

HIGHER SECONDARY CERTIFICATE (HSC) GAZIPUR IDEAL COLLEGE

JUN 2017 –JUL 2019

SECONDARY SCHOOL CERTIFICATE (SSC) RANI BILASHMONI GOVT. BOYS HIGH SCHOOL

JAN 2015-APR 2017

PROJECTS

Web-Based Movie Ticketing Management System

- Developed a web application for movie ticketing management using HTML5, CSS, JavaScript, AJAX, and jQuery for the front end.
- Implemented backend functionality with PHP, MySQL, and JSON for efficient data storage and retrieval.
- Link to GitHub repository: [<https://github.com/Rayied991/Movie-Ticketing-System.git>]

Crime Management & Reporting System

- Developed a Web Application for Crime Management & Reporting System using NestJS, typescript, and PostgreSQL for the Backend.
- Link to GitHub repository: [<https://github.com/Rayied991/Crime-Management-Reporting-System.git>]

Tour Guide

- developed a trip guide application with the front end built using WinForms and UI Libraries.
- Link to GitHub repository: [<https://github.com/Rayied991/tour-guide-C-sharp.git>]

E-Commerce Swift Sale Website

- Developed an e-commerce website using ASP.NET MVC and following an N-tier architecture.
- Designed and implemented the front end using HTML, CSS, and AngularJS to provide a seamless user experience.
- Utilized MS SQL Server as the database to store and retrieve product information, customer details, and order history.
- Utilized the Code First approach to design and implement the database structure and relationships.
